EDUCATION

Boston University | Boston, MA

May 2024

Bachelor of Arts in Computer Science

SKILLS

Languages: JavaScript, TypeScript, Swift, C#, HTML, CSS, SQL, Java, Python

Backend: Node.js, Express.js, REST APIs, GraphQL, MySQL, MongoDB, Strapi CMS

Tools: Docker, AWS, Oracle Cloud Infrastructure, Git, ML Pipelines, MediaPipe

EXPERIENCE

Independent Full Stack Developer / Contractor—Philadelphia, PA

Web Developer

October 2025 – Present

- Designed and deployed full-stack web applications using the [Next.js](https://nextjs.org/) JavaScript framework, MVC architecture, RESTful APIs, and a **SQL-based backend to manage users, inventory, and metadata** for commercial clients.
- Practiced **end-to-end product development** through iterative development sprints, completing projects from concept to deployment while preparing UX/UI templates for clients.
- Dockerized and deployed projects to **Oracle Cloud Infrastructure** to ensure scalability of codebase and reliability, reducing hosting costs for clients by 50%.

Levain Bakery—Philadelphia, PA

Baker and Sales Associate

April 2024 – Present

- Managed high-volume production workflows while coordinating with team members to maintain consistent product quality during peak demand.
- Utilized protocol to resolve unexpected order complications, reducing ticket delays and maintaining service quality.
- Implemented organized systems for workspace and inventory management, supporting smooth operations and minimizing workflow disruptions with minimal staff.

BlackRocket Productions—Freehold, NJ

Computer Science Teacher

May 2023 – Jan 2024

- Troubleshoot and maintained classroom IT environments, including **laptops, IDEs, and network connections**, ensuring zero technical downtime during workshops.
- Followed a game development curriculum to teach **game design principles, scripting, and C#** to youth, ensuring a 100% course completion rate.
- Authored and delivered clear, user-friendly **documentation and guided walk-throughs for common technical issues**, improving user confidence and reducing repeat support requests by over 30%.

PROJECTS

[Spiral: AI Bullet Journaling App](#)

September 2025

- Developed an iOS app in **SwiftUI** featuring a custom calendar, masonry layout, and personalization tools for structured user journaling.
- Implemented **data storage and querying** to securely save, retrieve, and manage user accounts and entries.
- Integrated REST APIs and **NLP-based AI tools** to enable intelligent user interactions and personalized content.

[Uvavine: Full Stack Social Media Site](#)

Jan 2025

- Built a high-concurrency social media platform using the **MERN stack** to support **1,000+ user interactions/day**.
- Designed advanced **UX systems** with **custom animation, virtualized DOM rendering, and lazy loading**.
- Implemented client-side logic for **dynamic content routing**, UI updates, and **secure session management**.

[PetMate: Pet Rental Web Application](#)

March 2024

- Led Agile development of an **object-oriented** full-stack pet rental platform as **Scrum Master**, managing sprint cycles, backlog grooming, and cross-functional team coordination across **Blazor front-end** and **ASP.NET/C# back-end**.
- Implemented backend data management using **NoSQL databases (AWS DynamoDB)**, supporting pet listings, user profiles, and geolocation data.
- Used Stripe API to ensure e-commerce capabilities for the application, allowing for secure payment methods.

Boston University 2024 Hackathon – Used Python to build and train a computer vision model to recognize hand gestures during a 24-hour hackathon.

[PHLASK.ME](#) – Philadelphia volunteer software engineer to make city resources more accessible
